## Education

### Computer Science Engineering

University of the Basque Country

Sep 2011 - Jul 2015

## Languages

Spanish

English

Basque

Software engineer with a DevOps mindset and 10+ years of experience, specializing in Go programming but open to exploring other technologies. Adept at backend development, infrastructure automation, and CI/CD improvements. Passionate about the KISS principle and avoiding unnecessary reinvention.

## Work Experience

### Tech Lead@ Bankable

Oct 2023 - Present

- ✓ Leading the Enablement team to streamline the onboarding process for new companies on the platform.
- ✓ Defining tasks, guiding the team, and ensuring seamless coordination with product and other teams.
- ✓ Refactoring and modernizing legacy code to improve maintainability and performance.

Go | Node.js | PostgreSQL | K8S | AWS | GPC | Helm | Terraform

### Platform Engineer@ Bankable (prev. Arex Markets)

Jul 2021 - Oct 2023

- ✓ Developed core services in Go, including AuthN/AuthZ and financial transaction management.
- ✓ Drove Infrastructure as Code (IaC) and GitOps adoption, leading to improved operational efficiency.
- ✓ Optimized CI/CD pipelines by migrating from Jenkins to GitHub Actions, standardizing deployments with Helm charts.
- ✓ Provided technical mentorship and support to developers, improving team productivity.

Go | Node.js | PostgreSQL | K8S | AWS | GPC | Helm | Terraform

### Backend Developer@ Paack

Jul 2020 - Jul 2021

- ✓ Built and maintained backend services in Go, exposing GraphQL APIs for frontend integration.
- ✓ Implemented gRPC-based inter-service communication and event-driven architecture using Pub/Sub.
- ✓ Integrated third-party services (Twilio, Auth0) to enhance platform capabilities.
- ✓ Automated deployments with GitHub Actions and Kubernetes.

Go | GCP | GraphQL | PostgreSQL | RabbitMQ

### Software Developer@ Arex Markets

Nov 2018 - Jul 2020

- ✓ Designed and implemented a full-stack onboarding service with external integrations.
- ✓ Developed financial data services, including invoice importing and transaction management.
- ✓ Managed deployments, message queues, and infrastructure components.

Go | Node.js | TypeScript | Vue.js | PostgreSQL | Docker | AWS | GPC

### Backend Engineer@ Holaluz

Feb 2018 - Nov 2018

- ✓ Designed and implemented a custom internal tool to optimize sales team workflows, improving efficiency and reducing manual work.
- ✓ Developed an automated system to manage distributor onboarding rejections, ensuring a smoother and more efficient process.
- ✓ Revamped legacy codebases by refactoring and enhancing test coverage, leading to better maintainability and reduced technical debt.

PHP | Symfony | Laravel | Vue.js | Angular | PostgreSQL | MySQL | AWS

## Projects

### Messenger

A tiny Go library to easily publish/subscribe asynchronous messages using the outbox pattern, supporting different message stores and brokers.

<https://github.com/x4b1/messenger>

### Go Coverage Report

A command-line tool that parses Go coverage output and generates a detailed report, supporting multiple output formats. Mainly used for publishing reports in GitHub PR checks as an alternative to third-party tools.

<https://github.com/x4b1/go-coverage-report>
