Education

Computer Science Engineering

University of the Basque Country

Sep 2011 - Jul 2015

Languages

Spanish

English

Basque

Software engineer with a DevOps mindset and 10+ years of experience, specializing in Go programming but open to exploring other technologies. Adept at backend development, infrastructure automation, and CI/CD improvements. Passionate about the KISS principle and avoiding unnecessary reinvention.

Work Experience

Senior Software Engineer @ Sword Health

Jul 2025 - Present

- ✓ Built AI agent for mental health assessments with clinical psychology team using LangGraph and Node.js
- ✓ Developed data pipelines ingesting for health and other metrics.
- ✓ Added OAuth authentication and payment provider integrations

Go | PostgreSQL | Node.js | Vue.js | GCP | Helm | K8S | Terraform

Senior Software Engineer @ Bankable (Arex Markets)

Jul 2021 - Jul 2025

- ✓ Built multi-tenant auth platform in Go with caching layer that reduced Auth0 costs
- ✓ Created onboarding system integrating AML/KYC providers with override support for edge cases
- ✓ Developed pricing engine for automated fee calculations and quotes
- ✓ Built company eligibility service aggregating data from multiple sources
- ✓ Automated prod data anonymization and replication to test environments
- ✓ Migrated CI/CD to GitHub Actions, standardized deployments with Helm and GitOps
- ✓ Managed cloud infrastructure across AWS, GCP, GitHub, and Cloudflare using Terraform
- ✓ Mentored engineers and worked with tech leads on platform improvements

Go | PostgreSQL | Node.js | Vue.js | AWS | GCP | Helm | K8S | Terraform

Backend Developer @ Paack

Jul 2020 - Jul 2021

- ✓ Built Go services with GraphQL APIs and gRPC for internal communication
- ✓ Implemented event-driven architecture using Pub/Sub
- ✓ Integrated Twilio for notifications and Auth0 for authentication
- ✓ Set up automated deployments with GitHub Actions and K8s

Go | GCP | GraphQL | PostgreSQL | RabbitMQ

Software Developer @ Arex Markets

Nov 2018 - Jul 2020

- ✓ Built services for automated invoice importing and transaction management
- ✓ Implemented direct bank integrations for payment processing
- ✓ Migrated Node.js monolith to Go microservices

Go | Node.js | TypeScript | Vue.js | PostgreSQL | Docker | AWS | GPC

Backend Engineer @ Holaluz

Feb 2018 - Nov 2018

- ✓ Built internal tool for sales team workflows
- ✓ Automated distributor onboarding rejection process
- ✓ Refactored legacy code and added test coverage

PHP | Symfony | Laravel | Vue.js | Angular | PostgreSQL | MySQL | AWS

Projects

Messenger

A tiny Go library to easily publish/subscribe asynchronous messages using the outbox pattern, supporting different message stores and brokers.

<https://github.com/x4b1/messenger>

Go Coverage Report

A command-line tool that parses Go coverage output and generates a detailed report, supporting multiple output formats. Mainly used for publishing reports in GitHub PR checks as an alternative to third-party tools.

<https://github.com/x4b1/go-coverage-report>
