Education

Computer Science Engineering
University of the Basque Country
Sep 2011 - Jul 2015

Languages

Spanish

English

Basque

Software engineer with a DevOps mindset and 10+ years of experience, specializing in Go programming but open to exploring other technologies. Focused on backend development, infrastructure automation, and CI/CD improvements. Passionate about the KISS principle and avoiding unnecessary reinvention.

Work Experience

Senior Software Engineer @Sword Health *Jul 2025 - Present*

- ✓ Built AI integrations for mental health assessments and health metrics data pipelines for clinical services
- ✓ Developed chat service with real-time messaging, media sharing, and notifications
- ✓ Integrated OAuth and payment gateways to streamline clinical workflows and improve user experience

Go | PostgreSQL | Node.js | Vue.js | GCP | Helm | K8S | Terraform

Senior Software Engineer @Bankable (Arex Markets) *Jul 2021 - Jul 2025*

- ✓ Built authentication service with Auth0 integration and custom authorization layer for platform-specific access control
- ✓ Architected customer onboarding workflows integrating AML/KYC verification, pricing engine, and eligibility services
- ✓ Modernized infrastructure by migrating CI/CD to GitHub Actions and managing multi-cloud deployments (AWS, GCP, Cloudflare) with Terraform
- ✓ Mentored engineers and automated production data anonymization for test environments

Go | PostgreSQL | Node.js | Vue.js | AWS | GCP | Helm | K8S | Terraform

Backend Developer @Paack *Jul 2020 - Jul 2021*

- ✓ Built event-driven microservices with GraphQL APIs and gRPC using Go and Pub/Sub
- ✓ Integrated Twilio and Auth0, automated deployments with GitHub Actions and K8s

Go | GCP | GraphQL | PostgreSQL

Software Developer @Arex Markets *Nov 2018 - Jul 2020*

- ✓ Built invoice automation, transaction management, and bank integrations
- ✓ Migrated Node.js monolith to Go microservices

Go | Node.js | TypeScript | Vue.js | PostgreSQL | Docker | AWS | GPC

Backend Engineer @Holaluz *Feb 2018 - Nov 2018*

- ✓ Built sales workflow tool and automated distributor onboarding
- ✓ Refactored legacy code and improved test coverage

PHP | Symfony | Laravel | Vue.js | Angular | PostgreSQL | MySQL | AWS

Projects

Messenger
A tiny Go library to easily publish/subscribe asynchronous messages using the outbox pattern, supporting different message stores and brokers.
https://github.com/x4b1/messenger
